\$100 for IMIA members \$160 for Non-members

(Join IMIA and then register for a total of \$150!)
Payments must be postmarked by April 22, 2011
Registration will close April 22nd

This session offers an introduction to the fundamental aspects of biomedicine, with focus on key concepts and common problems encountered in medical practice. The students will acquire the essential knowledge of the basic components of medical terminology. The individual organ systems and their diseases are considered in a systematic manner, with emphasis on the more common and important diseases. Basic anatomy (structure), physiology (function), pathology (diseases), and principles of diagnosis and treatment are discussed. Newer diagnostic procedures and methods of treatment are emphasized. In this way, the session establishes a supporting knowledge that can encourage more independent and active learning. This is an interactive class. During the session's activities, the class will be divided into groups to work together and discuss observations. Discounted Accommodations until April 10, 2011 at venue www.bestwestern-sunrise.com Group code: IMIA2011
